

## **REACH Declaration of Conformity**

We confirm that O.H. Industri A/S (OH) is familiar with the REACH Regulation. The impact of the REACH Regulation No.1907/2006 on the OHs business and products has been evaluated.

OH is not a manufacturer of chemical substances nor conduct activities that fall under the REACH regulation.

We hereby declare that all the OH products to the best of our knowledge comply with the REACH Regulation No.1907/2006, inclusive later amendments. OH products do not contain any of the REACH Substances of Very High Concern (SVHC) in a concentration above the threshold value of 0.1 %, as specified per ECHA Directive.

OH evaluate and review our products to fulfil the demands of the regulation, including the Candidate List of Substances of Very High Concern (SVHC). As OH is a downstream user under REACH we are dependent on that our material suppliers have registered the substances (>1 t) that we use in the manufacturing of our products. Based on information from our suppliers we declare, that all chemical substances used by OH is registered and assessed at the European Chemicals Agency (ECHA). Suppliers are obligated to inform OH about all changes of the delivered product and to send updated Safety Data Sheets.

If you need additional clarification on REACH as to our products, please do not hesitate to contact us.

Kind regards

O.H. Industri A/S

Carsten Mols  
Managing Director

The abbreviation REACH means Registration, Evaluation, Authorization and Restriction of Chemicals. The European Union (EU) REACH regulation aims to improve protection of human health as well as the environment from chemical substances. One of the main elements of Reach is Registration of chemical substances. This obliges manufacturers and importers of chemicals substances to provide a defined set of information, in the form of a registration dossier, to the Chemicals Agency (ECHA). Certain very dangerous substances will require authorization before they can be used and restrictions may be placed on the use of these. Downstream users will receive information on dangerous substances and preparations in safety data sheets just as today.
